Electric cooker wok 1 induction plate with open compartment 5 Kw 40x70x85h cm

Description

Electric wok 1 induction hob with open compartment, stainless steel construction. Knobs made of athermal material with functional serigraphy on edge. 6 mm thick black ceramic glass top. Continuous adjustment of the heating power. Under-glass display to show the set power level and to display any error signals. Sensor protection against overheating in case of dry pan operation. Pot presence detection sensor. Pan detection sensor with a diameter of less than 12 cm. Work surface in 20/10 thick AISI 304 stainless steel with rounded edges with large radius for easy cleaning. Stainless steel front cover. Possibility of working with any type of pan suitable for induction cooking: iron, cast iron or other ferromagnetic material. Constant energy yield, even if different shaped utensils are used. Significant time and energy savings due to half the cooking time and energy consumption compared to conventional cooking systems. Improved working environment due to reduced waste heat. Increased safety for the user: only the pans are heated while the worktop remains cold. The risk of burns is therefore greatly reduced. Laser-cut top finish to ensure "head-to-toe" and binding of the tops to each other. Height-adjustable stainless steel feet.

Dimensions

Dimensioni esterne	400x700x850 mm
