Table-top electric bain-marie 1 basin gn 1/1 power 1 kW 40x70x25h cm

Description

Table-top electric bain-marie 1 basin, stainless steel structure. Knobs in athermal material with functional silk-screen printing on edge. Heating by means of contact heating elements type ETCHED FOIL to allow heat exchange only towards the bottom of the basin and to save energy. Safety thermostat with manual reset to protect the heating element. Control with ON OFF switch and regulation thermostat between 30°C and 90°C with bulb immersed in the basin. AISI 304 stainless steel worktop with rounded edges with large radius for easy cleaning. Stainless steel front, side and rear panelling. Cold-forged AISI 304 stainless steel basin with drain hole, suitable for bowls up to 150 mm high and multiple container capacity up to 1/1 GN. Water filling and topping-up tap located on the dashboard. Elliptical-shaped AISI 304 handles. Bowl drain positioned on the dashboard and operated by a lever. Laser-cut top finish to ensure a "head-to-head" matching of tops and binding of tops to each other.

Dimensions

Dimensioni esterne	400x700x250 mm
